

July 4-8, 2011
 venue: The University of Hong Kong
 Hong Kong, China

Educators bring CSCL into practice in formal and informal education settings

Researchers contribute ideas, tools, methodologies and evaluation results to advance policy and practice

Policy-makers set policy goals, strategic directions and provide funding for education

CSCL2011

computer-supported collaborative learning

Connecting **research**
 to
policy and **practice**

www.isls.org/cscl2011

The theme of the **9th International CSCL conference** is *Connecting computer-supported collaborative learning to policy and practice* to examine:

- whether and how CSCL practices can bring deep changes to formal and informal educational practices at all levels;
- contribute to education improvement at a system level by informing education policy;
- contribute to bringing greater recognition to the field of Learning Sciences.

The program includes a lively mix of keynotes, paper sessions, submitted and invited symposia, workshops, panels, educational showcases, interactive events, posters sessions, demos and exhibitions.
